

Creating a wallet for Bitcoin Cash

1) Download "Electron Cash" : electroncash.org

2) Install and open Electron and choose "Create Standard Wallet"

3) Pick a name for your wallet.

4) Save the seed, either:

- by taking a screenshot
- by writing it down on paper
- by pasting it into a text document

5) Transcribe the seed, either from your screenshot or where you've written it down. Keep the document/paper, you might need it some day to restore your wallet. Click "NEXT" when you're done.

6) Choose a password.

7) Done! You've just created your wallet for Bitcoin Cash!

Paying for your truffles with Bitcoin Cash

4) Copy the BCH amount into the wallet.

5) Adjust the Fee, by pushing the slider further towards the middle.

This will add a cost of 1ct to your transaction, but makes it a LOT faster!

no fee = transaction takes hours to complete

6) This is how the window should look. Doublecheck and press "Send".

7) Done! The payment is completed and you should receive a confirmation from ProviThor within the next 10 minutes. Check your SPAM folder if it hasn't arrived yet.
